

Access more convenience.

AirCard® 595

by Sierra Wireless

- Newest Chipset (6800) – Faster uploads and downloads.
- Technology – Features CDMA EV-DO Rev A, EV-DO Rev 0 and 1xRTT.
- Built-in Antenna – New, built-in antenna design for improved durability and usability. A new robust antenna connector is also provided (hidden under removable rubber cap) for attaching an optional external antenna.
- Improved Interface – Incorporates NDIS functionality for better interface between the PC card and Windows operating system and features a 32-Bit CardBus with NDIS and DUN support.
- Software Developers Kit – Fully supported SDK and forum to aid in the development of custom enterprise applications.
- Dual-Band – 1900 MHz and 800 Mhz for more convenience when roaming with Sprint's partners.
- Proven Reliability – Sierra Wireless has a 13-year reputation for quality and support in all of its products.

Plug in and go faster. That's what the new AirCard 595 by Sierra Wireless offers for your mobile connectivity. With faster uploads and downloads plus a new, built-in antenna, the AirCard 595 is the Sprint Mobile Broadband Device you need for greater productivity and compatibility for all your data needs.

Rev A Technology ▶

Be among the first to get the next generation of high-speed wireless data with Sprint's EV-DO Rev A devices, when and where Rev A service is available. Rev A technology is estimated to provide upload speeds up to six times higher than Rev 0 technology. Rev A devices are fully backward-compatible, interoperable with Rev 0 networks.
